Restriction to one of the following inventions is required under 35 U.S.C. § 121:

- I. Claims 1-31 and 36, drawn to an optical fiber-based, four path, low-coherence reflectometer and corresponding methods, as well as a polarization-maintaining optical fiber sample path used in such a reflectometer, classified in class 385, subclass 11.
- II. Claims 32-35, drawn to data processing methods (note the step of "computing") for determining particular optical functions, classified in class 702, subclass 28.

The inventions are distinct, each from the other because:

Inventions I and II are related as combination and subcombination. Inventions in this relationship are distinct if it can be shown that (1) the combination as claimed does not require the particulars of the subcombination as claimed for patentability, and (2) that the subcombination has utility by itself or in other combinations (MPEP § 806.05(c)). In the instant case, the combination as claimed does not require the particulars of the subcombination as claimed because the methods of Invention II are very specific and the processing of sampled information in Invention I does not require any particular mathematical method. The subcombination has separate utility such as the determination of optical functions (e.g. phase retardation) of refractively measured samples.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, and

Art Unit: 2874

further because the search required for Group II is not required for Group I, restriction for examination purposes as indicated is proper.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement may be traversed (37 CFR § 1.143).

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR § 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR § 1.48(b) and by the fee required under 37 CFR § 1.17(i).

Any inquiry concerning the merits of this communication should be directed to Examiner John D. Lee at telephone number (571) 272-2351.
